Preconditions

User has experience using the FOLIO API User start harvesting with any available API tool: https:///oai/?verb=ListRecords&metadataPrefix=marc21&from= Date should be in the format: yyyy-mm-dd (for example: 2022-05-06) Record source is set to "Source record storage" on the "Settings"> "OAI-PMH">"Behavior"-> "Record source" = "Source record storage"

Steps

| | | |
|---|---|---|
| 1 | Go to the "Inventory" app | Inventory page with "Search & filters" pane is displayed. |
| 2 | Search for any instance underlying MARC record by selecting MARC option from "Source" filter option | The result list is retrieved |
| 3 | Click on the row with instance | Instance view page is displayed on the screen |
| 4 | Click "Actions" menu => Click "Edit MARC bibliographic record" | "Edit MARC record" mode is open |
| 5 | Modify MARC record => Click "Save & close" | The record is saved. Note that changes may not appear immediately. |
| 6 | Start harvesting using API call that mentioned in Preconditions: https://<oai-pmh-url>/oai/<apikey>?verb=ListRecords&metadataPrefix=marc21&from=<currentdate> | Response contains recently updated instance |
